Ventrino Software

Turning website visitors into buyers since 1994

Installing the script is pretty straight forward and should take about 10 minutes from start to finish

What you will need

Cpanel Access

Your FTP Details (probably same as above)

Installer downloaded to your PC (latest version HERE)

📂 **Categories**

🗁 Full Ventrino Scripts (7)
The Main Scripts

🗁 Update Patches (15)
Script Update Files

Simply download to your **PC** and double click it to start.

📂 **Files**

🗋 3.86 Professional Traffic Exchange (INSTALLER)
The professional traffic exchange script installer. This is the full professional traffic exchange script, if you have not purchased a license it will expire after 30 days. Simply download to your computer and double click and off you go
Filesize: 8.89 MB

🗋 3.86 Professional Traffic Exchange (ZIP Files)
The professional traffic exchange script ZIP Files. This is the full professional traffic exchange script, if you have not

Turning website visitors into buyers since 1994

Select **"next"** to continue and enter your **FTP** details 99% of the time these are the same as your Cpanel Username & Password if **NOT**, then you will have to login to Cpanel and create new **FTP** details

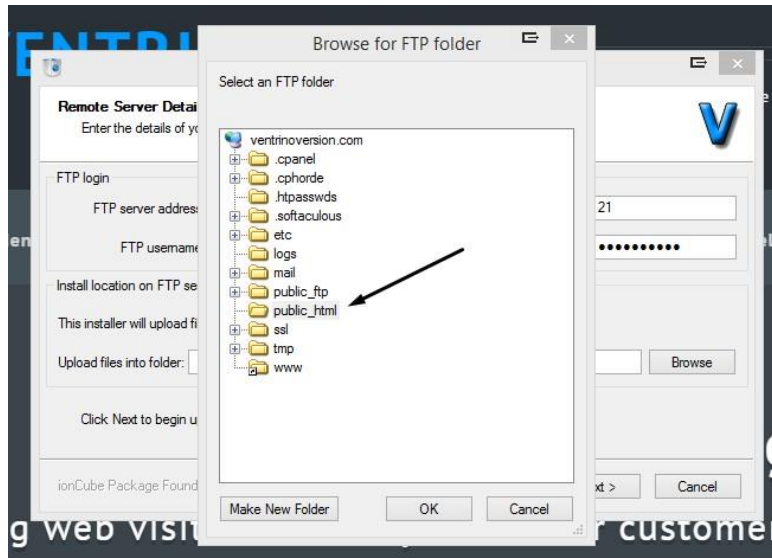

After adding your details select **"Browse"** to pick an installation folder
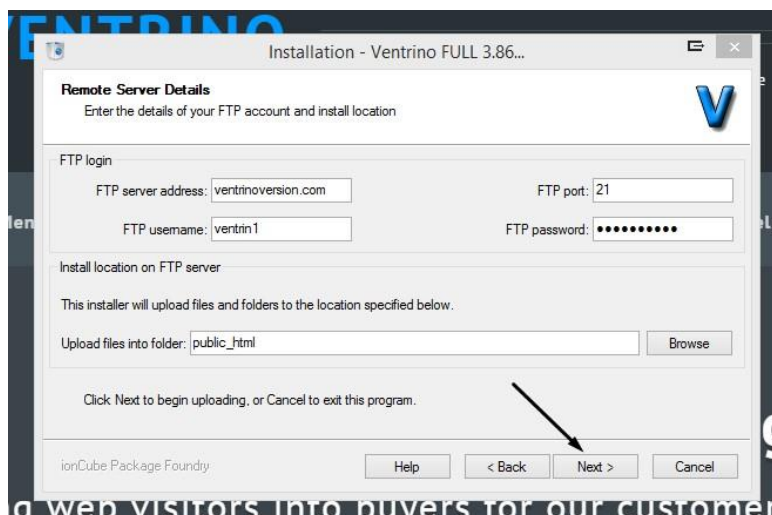

Ventrino Software

Turning website visitors into buyers since 1994

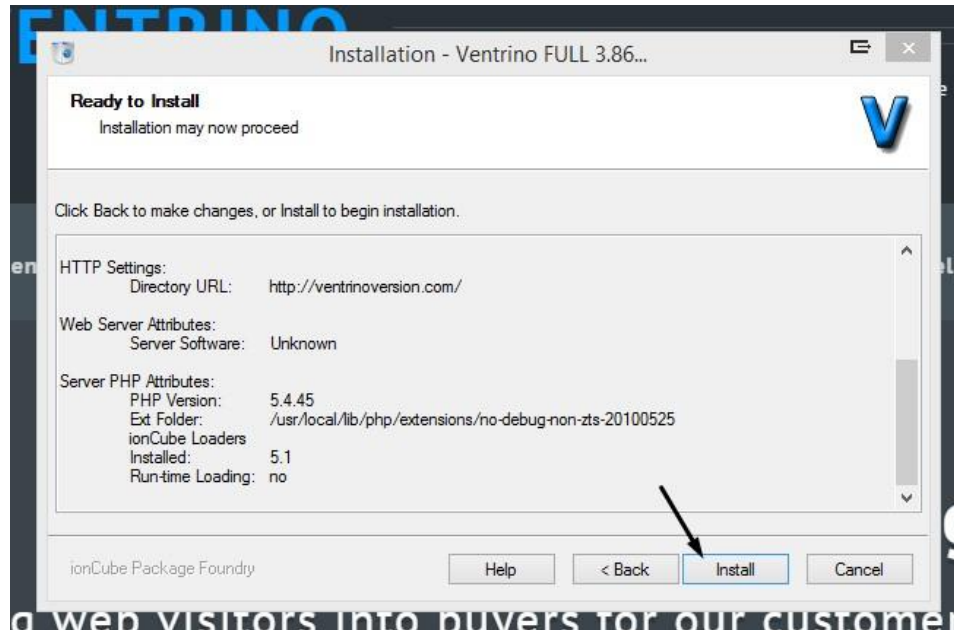

Select **"public_html"** or similar then select **"next"**

You will now see that the installer will install to that location so if you are installing into a different directory (not recommended*) then this would show here instead

***we recommend that you install on a domain of its own using the main directory**

Ventrino Software

Turning website visitors into buyers since 1994

The software will check a few things and then you select **"install"** to begin the process and this part will take about 5 minutes depending on your connection etc

Ventrino Software

Turning website visitors into buyers since 1994

As that step takes a few minutes we should login to cpanel and create a database to use

This may look slightly different on your cpanel but the process is similar

Create a New Database

New Database: ventrin1_te

Create Database

After we create a database we create a user

MySQL Users
Add a New User

Username: ventrin1_user

Password: ••••••••••••••

Password (Again): ••••••••••••••

Strength (Why?): Very Strong (100/100)   Password Generator

Create a User

Then add that user to the database (basically it allows them to do stuff)

Add a User to a Database

User: ventrin1_user ▾

Database: ventrin1_te ▾

Add

Add grant them **ALL** privileges

| ☑ ALL PRIVILEGES	
☑ ALTER	☑ ALTER ROUTINE
☑ CREATE	☑ CREATE ROUTINE
☑ CREATE TEMPORARY TABLES	☑ CREATE VIEW
☑ DELETE	☑ DROP
☑ EVENT	☑ EXECUTE
☑ INDEX	☑ INSERT
☑ LOCK TABLES	☑ REFERENCES
☑ SELECT	☑ SHOW VIEW
☑ TRIGGER	☑ UPDATE

Make Changes

Ventrino Software

Turning website visitors into buyers since 1994
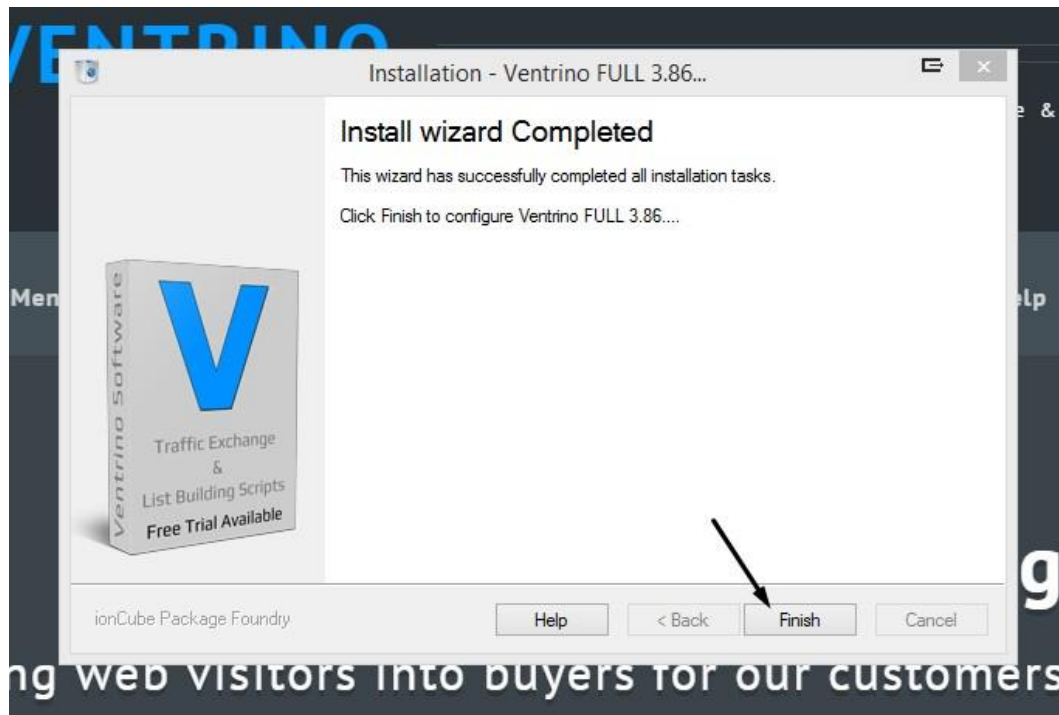

This should pass the few minutes for the installation process so we return to check on that and if finished select **"Finish"** to move on to the next step
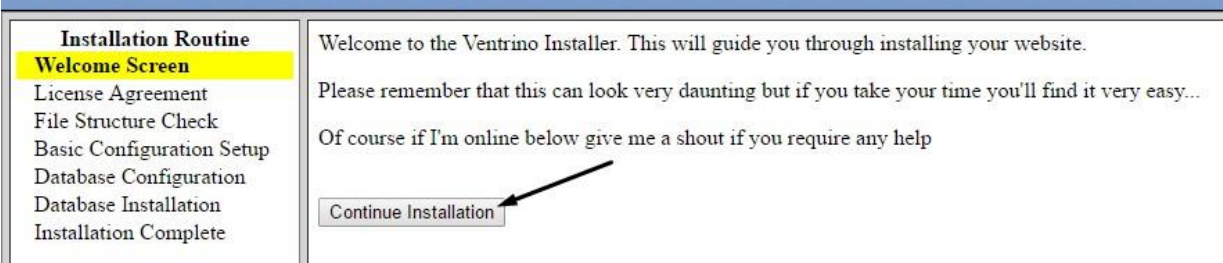

This part **LOOKS** the most daunting but it really only takes about 1-2 minutes and there is not much to it so don't worry and simply take your time

"Continue Installation"

Ventrino Software

Turning website visitors into buyers since 1994

Please read the license agreement and then select **"Agree"** to **"Continue Installation"**

99% of the time this section will be all fine **BUT** depending on your server type the permissions may not be set and if this the case you simply follow the instructions

(basically adding **FTP** details again and let us change the permissions for you)

"I couldn't find a server with issues to show you an error that MAY happen LOL"

Ventrino Software

Migration Complete

Basic Configuration Setup	
Owners Name :	Brian Jones
Website Name : ie: YourSite.com	the-domain-name.com
Installation URL :	http://the-domain-name.com
Admin Email Address :	support@ventrino.com
Email Signature* :	

*HTML input allowed.

Continue Installation

Next you add **Name, Website Name, URL & Email** (you can leave the signature for later if you wish)

Make sure you add the **website name** like: **the-domain-name.com** with the **(.com, .net etc)**

The **"Website Name"** handles a lot of the various links so not getting this correct just means that you will have to edit it **AGAIN** in a few minutes so get it right from the start

ALMOST DONE!

Ventrino Software

Turning website visitors into buyers since 1994

Now you add your database details that you created before and **"Continue Installation"**

If you get **ANY** errors here, **DOUBLE** check that your **DATABASE** information is correct and that you have assigned the **USER** to the correct **DATABASE** and put the right info in the fields above

Installation Complete!

Do not forget to setup the below server configurations :

404 Redirection
Apache (.htaccess file) :
ErrorDocument 404 /404.php
Windows IIS :
/404.php

Scheduled File
Linux Cron Job:
*/10 * * * * wget -O schedule http://ventrinoversion.com/backend/scheduled.php >/dev/null 2>&1
Windows Scheduler :
http://ventrinoversion.com/backend/scheduled.php

BACK to Cpanel to add a **"Cron Job"** and using the example above you would simply copy & paste

wget -O schedule http://ventrinoversion.com/backend/scheduled.php >/dev/null 2>&1

then set it to run every **10** minutes

Common Settings:
-- Common Settings --
-- Common Settings --
Once Per Minute (* * * *)
Once Per Five Minutes (*/5 * * * *)
Twice Per Hour (0,30 * * * *)
Once Per Hour (0 * * * *)
Twice Per Day (0 0,12 * * *)
Once Per Day (0 0 * * *)
Once Per Week (0 0 * * 0)
On the 1st and 15th of the Month (0 0 1,15 * *)
Once Per Month (0 0 1 * *)
Once Per Year (0 0 1 1 *)
Add New Cron Job

I select the 5 minute one from the **"Common Settings"** and change to **10** for simplicity

Minute:	*/10	Once Per Ten Minutes (*/1 ▾	✓
Hour:	*	Every Hour (*)	✓
Day:	*	Every Day (*)	✓
Month:	*	Every Month (*)	✓
Weekday:	*	Every Day (*)	✓
Command:	wget -O schedule http://ventrinoversion.com/backend/sche	✓

Add New Cron Job

Ventrino Software
Turning website visitors into buyers since 1994

And to finish off the installation process we go back to Cpanel and select **"File Manager"**

Files

Backups	Backup Wizard	File Manager	Legacy File Manager	Disk Space Usage	Web Disk
FTP Accounts	FTP Session Control				

Then pick the root location and select **"Go"**

File Manager Directory Selection

Directory Selection

Select the directory that you wish to open:

- ○ Home Directory
- ● Web Root (public_html/www)
- ○ Public FTP Root (public_ftp)
- ○ Document Root for:
  ventrinoversion.com ▼

- ☐ Show Hidden Files (dotfiles)
- ☐ Skip this question, and always open this directory in the future when I choose to open "File Manager".
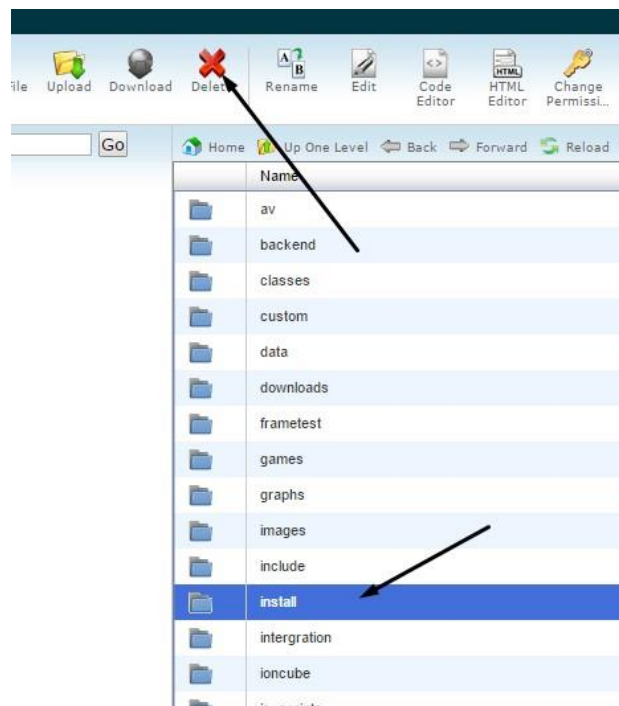

[Go]

Ventrino Software
Turning website visitors into buyers since 1994

Then you just select **"install"** by clicking once

And then Select **"Delete"** once **"install"** is Highlighted

And confirm that you are deleting the **"install"** files

Ventrino Software

Turning website visitors into buyers since 1994

This finishes off the installation process and you are good to go!

I strongly recommend that you take a full back up while you are in Cpanel so you simply have a fresh start if you mess around too much with the setup... On that note,

If you would like to have a look at the "Quick Start Guide" click **HERE**
